**V. INTERNATIONAL
WORKSHOP ON
NEUROSURGICAL ENDOSCOPY**

İstanbul, Turkey
16-17 September, 2011

Dear colleagues,

We are pleased to introduce the 2011 program on V. Neurosurgical Endoscopy course to you.

The use of neuroendoscopy has increased significantly in our daily practice and 3rd ventriculostomy has become the technique of choice in a significant number of patients with hydrocephalus. Therefore, every neurosurgeon should be familiar with this procedure.

The use of neuroendoscope becomes more common in the daily practice of neurosurgery. The treatment of different types of cysts, skull base tumors, spinal pathologies and even early cases of craniosynostosis can be done with endoscopic methods.

This workshop will provide a forum for neurosurgeons to discuss the most recent knowledge regarding neurosurgical endoscopy. Detailed anatomy, different indications, short and long term results will be extensively reviewed. Live operations will be performed.

Carefully selected panel of expert speakers will provide the participants with an exceptional educational experience.

We hope that you will be able to join us during September 16-17, 2011.

We look forward to seeing you in Istanbul, Turkey.

Yours

Prof. Dr. M Memet Özek
