Hannover, 20 October 2009/ mj

Dear Colleagues,

In the coming year the International Neuroscience Institute (INI) will celebrate its 10-year anniversary in Hanover.

We are organizing a very special scientific and social program between July, 20<sup>th</sup> – 25<sup>th</sup>, 2010.

The topics are:

1. Impact of Technologies and Methods for Advances in Neurosurgery
2. Influence of Interdisciplinary Cooperation for the Progress in Neurosurgery
3. Contribution of Medical Industry for the Development of Neurosurgery

The contribution of interdisciplinary cooperation between neurosurgeons and other related disciplines as well as medical industry will be emphasized.

It would be a great pleasure for me to welcome you at this exciting congress in Hanover.

During the meeting we will try our best to inform you about the development of the International Neuroscience Institute Hanover.

In case you are interested to experience the daily work of our Institute, I am planning several live surgeries of CP-angle-tumours before starting the scientific program. These will be performed on Tuesday, 20<sup>th</sup> and Wednesday, 21<sup>st</sup> July. Our technology of pre- and intraoperative brain mapping in cerebral processes of critical areas will also be demonstrated in detail.

With best wishes and looking forward to welcoming you in Hanover.

Madjid Samii, M. D., Ph. D.  
President
