Invitation

Dear colleagues,

It has been long since we left the days discussing the indications of endoscopic transsphenoidal surgery behind, and now we are pleased to inform you that the days for discussing facts and future are upcoming.

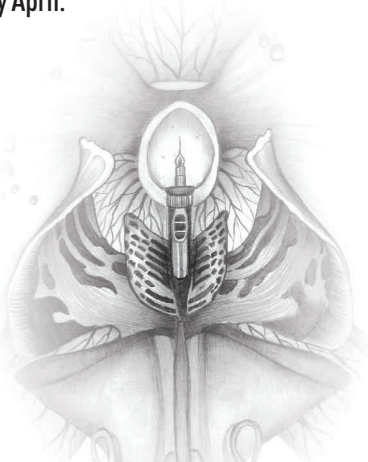

Endoneurosurgery is undisputedly one of the important areas where our country can attain and perhaps surpass Europe and America in terms of surgical technology, skills and science.

This year's meeting incorporates a rich content in which, in light of all the experiences gained in the previous years, the regional anatomy, radiology and the genetic features of pathologies along with clinical and surgical approaches will be discussed in full details.

We would like to cordially invite everyone interested in endoscopic skull base surgery, including research assistants approaching the end of their trainings and young colleagues, to attend this year's meeting, in which nationally and internationally distinguished speakers will share their past experiences and current knowledge that I assume all will enjoy listening to. The first day of meeting will be followed by a live surgery and an interactive session of discussions on the second day.

See you all in early April.

Mustafa Berker

April 3, 2020, Friday

- 08.00 - 08.30 Registration
08.30 - 09.00 Opening Ceremony
Guitar performance: Ahmet Kanneci
09.00 - 09.30 Anatomy of sellar - parasellar region
Dr. Emel Avcı
09.30 - 10.00 CT imaging of sellar - parasellar region
Dr. Raşan Göçmen
10.00 - 10.30 MR imaging of sellar - parasellar region
Dr. Kader Karlı Oğuz
10.30 - 11.00 Coffee Break
11.00 - 11.30 Preoperative preparation and assessment for skull base surgery
Dr. Mustafa Berker
11.30 - 12.00 Surgical approaches to cavernous sinus
Dr. Savaş Ceylan
12.00 - 13.30 Lunch
13.30 - 14.00 Medical treatment resistant prolactinomas
Dr. Demet Çorapçıoğlu
14.00 - 14.30 Molecular genetics of pituitary adenomas
Dr. Melike Mut
14.30 - 15.00 Evolution of pituitary adenomas to PitNET and its implications
Dr. Figen Söylemezoğlu
15.00 - 15.30 Coffee Break
15.30 - 16.00 Surgical treatment of pediatric craniopharyngiomas
Dr. Gökmen Kahiloğulları
16.00 - 16.30 Alternative perspectives for challenging cases
Dr. İlkay Işııkay
16.30 - 17.00 Reconstruction of skull base
- Prevention of CSF fistula.
Dr. Mustafa Berker
17.00 - 17.30 Live surgical case presentation
Dr. Dicle Karakaya

April 4, 2020, Saturday

- 08.30 - 11.30 Live surgery broadcast
11.30 - 11.45 Discussion
11.45 - 12.15 Stereotactic radiosurgery of tumors in sellar - parasellar region
Dr. Selçuk Peker
12.15 - 12.45 Prevention and management of complications in endoscopic skull base surgery
Dr. Mustafa Berker
12.45 - 13.00 Closing and photoshoot
